Top 10 Electricity Saving Tips

UNPLUG

Even if it is off, electricity is brought to the outlet where appliances are plugged in and unplugging them saves a lot of electricity.

OPEN WINDOWS

Open windows to cool down the house instead of blasting the air conditioning.

ECO-FRIENDLY

Switch light bulbs to Eco-friendly bulbs. They save electricity, and money, while still giving as much light as other bulbs.

TURN OFF

Turn off lights and fans when leaving a room even if you are coming back in few minutes. This can save 7 dollars a month.

COLD WATER

Washing clothes in cold water can save electricity and an average of 9 dollars a month. That's 108 dollars a year.

INSULATE

Insulate the house to keep warmth in during the winter and out during the summer.

CLEAN FILTER

Clean the lint filter every time before drying clothes to ensure they will dry faster. This will save time, money, and electricity.

RECYCLE

Recycle that old fridge. Old refrigerators use about three times more energy than new models.

AUTO-SENSOR

If your dryer has an auto-sensor, it can conserve energy by not over drying your clothes.

UPGRADE

Update the air conditioner to use about 14% less energy when cooling or heating your house.
